Dear Venngage,

My name is Jiaheng. Li and I am pleased to be applying for the position of Software Engineer Intern at Venngage . I was excited to find this opening at the University of Toronto PEY website and feel that my skills and studies make me a perfect fit for this job. As a third-year computer science student at the University of Toronto St.George Campus, I have learned multiple computer languages like Python, C, Java, Javascript and SQL language and can apply them skillfully. I developed an Android app by using Java and writing in the Android studio with my teammates in CSC207 during my second year. Furthermore, in a course named CSC301, I am doing a new project which also develops a web app which we need to use Android Studio for real customer demand with my teammates. And in our other three assignments, we create a prototype web app by using Python Flask and Javascript, and deployed to the web using Heroku.

In the past four months of summer vacation, I have accumulated a wealth of front-end work experience. I had three and a half months of internship in The People's Insurance Company (Group) of China Limited this summer. I worked with a front end program group and operated two data query websites successfully through self-learning PHP and Javascript. During this time, I know how to apply the knowledge I have learned in school to practical work and on the other hand, this work experience improved my ability of teamwork and problem-solving and taught me how to design followed by customer needs.

It is a great honor for me to work in Venngage and being a Software Engineer Intern has always been a goal for me. During these three years of university, it also improved my ability to coding and algorithm. Besides, I know how to operate Informix and MySQL with SQL and have experience with using public cloud.

I believe that I can be qualified for this internship. I have enclosed my resume. I look forward to the opportunity to discuss my skills and qualifications in person at your earliest convenience. Please reach me by email at jiahengwl.li@mail.utoronto.ca or by phone at 6479756389. Thank you for your time and I look forward to hearing from you soon.

Sincerely yours,

Jiaheng Li
